PART 43—GENERAL OPERATION RULES

WAR EMERGENCY REGULATIONS

At a session of the Civil Aeronautics Board held at its office in Washington, D. C., on the 31st day of July, 1945. Effective August 1, 1945, Part 43 of the

Civil Air Regulations is amended by adding a new § 43.8 to read as follows:

§ 43.8 War emergency regulations.

§ 43.80 Designation of airports.

§ 43.800 Definitions. (As used in this § 43.8). (a) The term "aircraft" means all aircraft other than those operated by scheduled air carriers, the United States Army or Navy, the Civil Aeronautics Administration, or the Civil Aeronautics Board.

(b) A "designated landing area" is an area designated by the Administrator as a regular base of operation for aircraft during the period of national emergency. (c) A "local flying area" is an area in the vicinity of a designated landing area, including any channel leading thereto, recorded by the Administrator after coordination with all local interests, and with the defense commander if within a vital defense area, for nonexclusive use of local aircraft operations emanating from that designated area.

(d) A "vital defense area" is in area set aside by competent military authority within which the operation of aircraft is prohibited or is authorized only subject to prescribed conditions.

§ 43.801 Flight rules. (a) Aircraft shall be based only at designated landing areas.

Note: An aircraft is not prohibited from making an occasional take-off and landing from areas other than designated landing areas outside vital defense areas. This does not apply to military airfields, use of which by civil aircraft requires specific authorization by appropriate military authorities.

(b) No person shall pilot an aircraft within a vital defense area unless the flight has been approved by the responsible defense command or by the agency to which authority has been delegated for such approval: *Provided*, That approval is not required for flights from designated landing areas confined to the local flying area.

§ 43.802 Cancellation of designation. The Administrator may, at any time, cancel the designation of a landing area if it is determined such action is necessary to public safety or to prevent conflict with military operations.

§ 43.81 Military insignia. No aircraft, other than aircraft of the national defense forces of the United States, shall be operated with emblems, insignia, or markings of the national defense forces unless written authorization for such use is obtained from the War or Navy Departments.

§ 43.82 Search of passengers' baggage. The pilot in command of an aircraft, or any person designated by him, shall search passengers' baggage or cargo whenever and to the extent that the pilot believes national security so requires. If such baggage or cargo includes a camera,

PART 803-GENERAL ORDERS

APPROVAL OF INCREASES IN WAGES AND SALARIES

The National War Labor Board has amended its General Order No. 7 to read as follows:

§ 803.7 Approval of increases in compliance with Fair Labor Standards Act. Since Title VI, section 1 of Executive Order No. 9250, dated October 3, 1942, states that "nothing in this order shall be construed as affecting the present operation of the Fair Labor Standards Act" and since statutes and orders of the duly constituted authorities of the several states fixing minimum rates for certain types of workers carry out the true pur-poses and intent of the Fair Labor Standards Act, and are designed and intended to eliminate substandards of living within the meaning of section 2 of Title II of Executive Order No. 9250, the National War Labor Board hereby approves increases in wage and salary rates made in compliance with such statutes and orders: Provided however, That if any changes in such statutes or orders are made or promulgated after April 8. 1943, increases directed thereby which would result in a wage or salary rate in excess of the rate which the War Labor Board establishes as a minimum wage rate by General Order No. 30, may not be made without the approval of the Board.

(E.O. 9250, Oct. 2, 1942, 7 F.R. 7871, as amended by E.O. 9381, Sept. 25, 1943, 8 F.R. 13083; E.O. 9328, April 8, 1943, 8 F.R. 4681; Act of Oct. 2, 1942, C 578, 56 Stat. 765, Pub. Law 729, 77th Cong.)

Approved: July 19, 1945.

Connell Sales Company is a partnership composed of Owen W. Connell and Miriam E. Connell engaged, since January 1943, as jobbers and manufacturers' agents in selling merchandise of various kinds to Ship's Service Stores, Army and Marine Post Exchanges. The principal place of business of the partnership is located at 420 Market Street, San Francisco, California. Between May 16, 1944 and June 19, 1944, the company improperly extended preference ratings on four of its purchase orders for the acquisition of approximately 616 leather utility kits, and between May 11, 1944 and July 13, 1944, the company improperly certified 25 of its purchase orders as "Navy Contract" for acquiring 3,683 leather utility kits in violation of Priorities Regulation No. 3 and Priorities Regulation No. 1, respectively. These violations were the result of gross negligence on the part of O. W. Connell, amounting to wilfulness, tending to cause and probably causing diversion of essential materials to uses unauthorized by the War Production Board and have interfered with the controls established by the War Production Board for the distribution of critical materials. In view of the foregoing, it is hereby ordered, that:

§ 1010.860 Suspension Order No. S-860. (a) Owen W. Connell and Miriam E. Connell shall not for sixty days from the effective date of this order apply or extend any preference ratings, regardless of the delivery date named in any purchase order to which such ratings may be applied or extended.

(b) Owen W. Connell and Miriam E. Connell shall cancel immediately all preference ratings which they have applied or extended to orders which have not yet been filled, except that if they have extended a customer's rating to get an item for delivery without change in form to that customer (as distinct from replacing it in inventory), they need not cancel the rating; Provided, The item, when received, is promptly delivered to the customer whose rating was extended.

(c) All preference ratings presently outstanding in connection with orders for delivery of materials to Owen W. Connell and Miriam E. Connell or placed prior to September 24, 1945 are void and shall not be given any effect by their suppliers or by any other person. ST. ANNE FREEZING AND PROCESSING CO.

Mary Lucido Harder is an individual doing business as St. Anne Freezing and Processing Company and in that capacity she owns a fish processing plant located at Pier #92 in the City and County of San Francisco, California. Mary Lucido Harder applied to the War Production Lucido Board for authorization to construct a wharf, decking and piling, a one-story frame building and an electric power line at a cost not to exceed \$23,250 to be used for drying, salting, pickling, smoking and freezing of fish as well as for the reduction of fish. The application was approved and authorization granted for the project with the elimination of the fish reduction plant. Notwithstanding, the respondent proceeded on or about July 15, 1944 and thereafter to construct the project with the fish reduction plant. Certain of the materials used therein were obtained by extending priorities ratings in violation of Priorities Regulation No. 1, Section 944.11. Mary Lucido Harder was aware of War Production Board restrictions on construction, and the construction of the project and the installation of machinery for a fish reduction plant, and the unauthorized extension of priorities ratings, constituted wilful violation of L-41 and Priorities Regulation No. 1.

This violation has diverted critical material to uses not authorized by the War Production Board and has hampered and impeded the war effort of the United States. In view of the foregoing, it is hereby ordered, that:

§ 1010.863 Suspension Order No. S-863. (a) For a period of one year, Mary Lucido Harder, doing business as St. Anne Freezing and Processing Company, or otherwise, her heirs, assigns, agents and employees, shall not use the facilities located at Pier 92, San Francisco, California, that is, the construction and equipment built and installed by Respondent in that location as a fish reduction plant, or use said facilities to reduce offal or whole fish: Provided, however, That said facilities may be used to reduce offal produced from salting and fish freezing operations conducted on said premises;

(b) Nothing contained in this order shall be deemed to relieve Mary Lucido Harder from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provision hereof;

(c) Prohibition against taking any action includes the taking indirectly as well as directly of any such actions;

The violations with respect to the photomounts were wilful and the violations with respect to the albums were grossly negligent.

This excessive use of paper has diverted scarce materials to uses not authorized by the War Production Board. In view of the foregoing, it is hereby ordered, that:

§ 1010.867 Suspension Order No. S-867. (a) The Housh Company, Inc.,

during each of the third and fourth quarters of 1945 and the first and second quarters of 1946, shall reduce its consumption of paper and paperboard to 20,000 pounds per quarter: Provided. PART 3133-PRINTING AND PUBLISHING [Limitation Order L-240, as Amended Aug. 8, 1945]

(x) Violations.

# Scope

§ 3133.6 Limitation Order L-240-(a) The purpose of this order. This order does two things: First, it limits the tonnage of print paper which may be used by a publisher in printing a news-paper. This is called his "consumption quota". Second, it limits the tonnage of print paper which may be ordered or accepted by a newspaper publisher. This is called his "delivery quota". A publisher's consumption quota is on a quarterly basis and his delivery quota is on a monthly basis.

# Definitions and Explanations

(b) Newspaper. "Newspaper" means any publication generally recognized as a newspaper in the newspaper industry, regardless of the frequency of issuance. The term includes all supplements, inserts and other printed matter physically incorporated into a newspaper or delivered together with it.

Where two or more newspapers are published by the same publisher, whether in the same city or in different cities, each newspaper shall operate under a separate consumption quota and a separate delivery quota. In computing his consumption quota a publisher must make separate calculations for morning, evening and Sunday editions, but these

figures must be consolidated into a single consumption quota for each newspaper, in accordance with the instructions contained in paragraph (k).

However, morning, evening, Sunday and other editions of the same newspaper shall operate under a single consumption quota and a single delivery quota.

In determining whether a publisher issues separate newspapers or separate editions of the same newspaper. number and form of the reports filed by the publisher with the Audit Bureau of Circulations in 1941 will be controlling, in the absence of special circumstances. Thus, if a publisher in 1941 filed consolidated statements with the Audit Bureau of Circulations covering morning, evening and Sunday issues, even if these issues had different names, different formats and different staffs, they will ordinarily be considered as a single newspaper for the purposes of this order. If a publisher in 1941 filed separate statements with the Audit Bureau of Circulations covering his morning, evening, Sunday and other publications, they will ordinarily be considered as separate newspapers for the purposes of this order.

If a publisher is uncertain as to whether or not his publication is a newspaper as defined in this order, he may ask the War Production Board for an official determination. The War Production Board may also make this determination upon its own motion. Such a determination, issued to the publisher in the name of the Recording Secretary of the War Production Board, shall be conclusive for the purposes of this order, unless revoked or modified by the same authority.

(c) Camp papers and free distribution publications. Army or Navy camp, post, station or unit "newspapers" or news sheets generally are not recognized as newspapers in the newspaper industry. They are covered by Order L-241 (commercial printing). Shopping guides, want ad periodicals and publications in newspaper format distributed free or at nominal cost also are not recorgnized as newspapers within the meaning of this order and are governed by Order L-241, Schedule II. If a publisher issued a free distribution newspaper in 1941, his consumption quota shall be determined in accordance with Schedule II to Order L-241 and that order shall govern even if the circulation of the publication has subsequently been changed

in whole or in part to a net paid basis.
(d) Publisher. "Publisher" means a person who publishes a newspaper, including an individual, partnership, association, business trust, corporation, governmental corporation or agency, or any organized group of persons whether incorporated or not.

(e) Print paper. "Print paper" means any grade, quality, type or basis weight of paper used in publishing a newspaper. The term includes paper reclaimed wholly or partly from printed or unprinted waste, as well as paper made entirely from virgin fiber. It also includes roll wrappers, newsprint used as wrappers, identification sheets and labels

for newspapers, and production waste, whether or not this waste is subsequently salvaged for other uses.

(f) Use. All production waste shall be included in the tonnage of print paper "used" in printing a newspaper. Transit damage shall not be included in a publisher's "use" of print paper. A publisher may determine the dates on which paper is "used" under this order either on the basis of the dates when the paper is actually printed or the dates appearing on the respective issues of the newspaper, provided he continues to use the same method which he used in computing his 1941 base tonnages.

(g) Net paid circulation. "Net paid circulation" means the number of copies of a newspaper which have been sold (exclusive of bulk sales), as audited by the Audit Bureau of Circulations or (in the case of newspapers which are not members of the Audit Bureau of Circulations) as verified in accordance with the standards of the Audit Bureau of Circulations

of January 1, 1942.

"Inventory" means (h) Inventory. all the print paper which is owned by a publisher or is available for his use. includes the print paper which he has on hand, in storage, and in transit and paper held for his use by a paper merchant, warehouseman or other person, regardless of its physical location. However, it does not include print paper shipped by water and held in warehouse by a paper manufacturer or merchant as part of the inventory of the manufacturer or merchant; such paper does not become part of a publisher's inventory until it is delivered to him.

(i) Transfer of quotas—(1) Quotas established by different orders. provided by one War Production Board order may not be used for the purposes set forth in any other order. Thus, for example, a publisher may not use for the printing of a newspaper any part of a consumption quota established under Orders L-241 (commercial printing) L-244 (magazines) or L-245 (books) and he may not permit any part of his con-sumption quota established under this order to be used for commercial printing, magazines or books. If a newspaper publisher also conducts a job printing business, he must keep these two operations separate for quota purposes. The amount of print paper which he is permitted to consume and the amount which he is permitted to order or accept for the publication of his newspaper is limited by this order. The amount of print paper which he is permitted to consume and the amount which he is permitted to accept for his commercial printing business is limited by Order L-241.

(2) Transfer of quotas to different persons. The rules governing the assignability of quotas are set forth in Priorities Regulation 7a.

# Consumption Quota

(j) Allowable consumption. In the third quarter of 1945 and in each calendar quarter after that, no publisher may use or cause to be used, in the publication of a newspaper, print paper in excess of:

(1) His quarterly consumption quota, which shall be computed in accordance with the instructions set forth in paragraph (k) or (m) plus

(2) Any less-than-quota savings carried over from previous calendar quarters, as provided in paragraph (1), plus

(3) Ex-quota tonnage, if any, which may have been granted on appeal for

consumption in that quarter.

(k) Computation of consumption quota-(1) Base tonnages. Ascertain, separately, the tonnage of print paper comprising the net paid circulation of morning, evening, Sunday or other issues of the newspaper in the corresponding quarter of 1941. Add 3 per cent to each figure. (This 3 per cent is an arbitrary allowance to compensate for production waste and should be added whether the actual production waste in 1941 was greater or less than 3 per cent). These are the "base tonnages" for morning, evening, Sunday or other issues of the newspaper, which shall be adjusted in accordance with instructions 2, 3, and 4.

(2) Circulation increase. Ascertain, separately, the percentage increase or decrease in average net paid circulation of morning, evening, Sunday or other issues of the newspaper in the calendar year 1942 as compared with the calendar year 1941. (The average net paid circulation for each year shall be determined by adding together the average net paid circulation for each of the four quarters of the year and dividing by four).

(3) Tonnage equivalent of circulation increase. Apply, separately, the respective percentages of circulation increase or decrease determined under instruction number 2 to the respective base tonnages determined under instruction number 1 for morning, evening, Sunday

or other issues of the newspaper.
(4) Adjustment of base tonnages. Adjust the respective base tonnages determined under instruction number 1 by adding or subtracting the number of tons represented by the percentage circulation gain or loss determined under in-

struction number 3.

(5) Total adjusted base tonnage. Total the respective base tonnages for morning, evening, Sunday or other issues of the newspaper determined under instruction number 1. Total the respective adjusted base tonnages for morning, evening, Sunday, or other issues of the newspaper determined under instruction number 4. The larger of these two totals is the publisher's "total adjusted base tonnage" from which the required reductions shall be applied.

(6) Sliding scale of reductions. Reduce the total adjusted base tonnage by the following sliding scale of percentage cuts:

(i) Deduct 3% of the amount over 25 tons but not over 125 tons.

(ii) Deduct 6% of the amount over 125

tons but not over 250 tons.

(iii) Deduct 9% of the amount over 250 tons but not over 500 tons.

(iv) Deduct 15% of the amount over 500 tons but not over 1000 tons.

(v) Deduct 18% of the amount over 1000

(7) Consumption quota. The balance remaining after subtraction of the above reductions from the total adjusted base tonnage determined under instruction

number 5 is the publisher's consumption

quota for the quarter.

(8) Adjustment for print paper lighter than 32-pound basis weight. If a publisher orders print paper lighter than 32pound basis weight, his consumption quota for the current calendar quarter shall be reduced proportionately as follows: First, determine the percentage by which 32-pound paper exceeds such lighter paper in weight. Second, multiply the tonnage of lighter paper so ordered by this percentage. Third, subtract the result from the publisher's consumption quota. For example, if a publisher has a consumption quota of 200 tons and orders 100 tons of 30-pound basis weight paper, his consumption quota shall be reduced by 6% tons, since 32-pound paper is 63/3 % heavier than 30pound paper.

(9) Fourteenth Sunday in third quarter of 1945. Inasmuch as there are 14 Sundays and 78 weekdays in the third quarter of 1945, compared with 13 Sundays and 79 weekdays in the third quarter of 1941 and 1944, the publisher of a daily and Sunday newspaper may increase his consumption quota in the third quarter of 1945 by the excess of his average Sunday use of print paper in the third quarter of 1944 over his average weekday use of print paper in the third quarter of 1944. The publisher of a newspaper issued only on Sundays may increase his consumption quota in the third quarter of 1945 by one-thirteenth of his allowable use of print paper in the third quarter of 1944. No publisher may increase his delivery quota because of any additional tonnage he may use for the fourteenth Sunday in the third quar-

ter of 1945. (1) Carry-over. If a publisher-uses less print paper than he is permitted to use in the fourth quarter of 1943, or in any calendar quarter after that, he may add this tonnage to his consumption quota but not to his delivery quota, in any succeeding quarter. This paragraph does not apply to the print paper which a publisher is permitted to use under paragraph (m) (2).

(m) Consumption quotas for certain tupes of newspapers. Excepted from the provisions of paragraph (k) are certain types of newspapers described in this paragraph (m), whose consumption quotas shall be computed as follows:

(1) Special types of newspapers. Any newspaper containing the equivalent of 8 standard-size pages or less which is authorized to be admitted to the mails as second-class matter under the provisions of section 521 of the Postal Laws and Regulations of 1940 (Title 39, U. S. C., sec. 229) pertaining to the publications of benevolent, fraternal, trades-union, professional, literary, historical, and scientific organizations and societies shall have a consumption quota of print paper in any calendar quarter equal to either:

(i) Its quarterly consumption of print paper in any one of the first three calen-

dar quarters of 1944; or

(ii) Its consumption of print paper in the corresponding calendar quarter of 1943. If the publisher selects this latter method in any calendar quarter, he may increase his consumption quota in that

quarter by that percentage by which the average number of copies per issue in the third quarter of 1944 exceeds the average number of copies per issue in the corresponding calendar quarter of 1943. For example, if a newspaper's consumption of print paper in the first quarter of 1943 was 5 tons with an average press-run in that quarter of 5,000 copies per issue, and its average press-run in the third quarter of 1944 was 6,250 copies per issue, his consumption quota for the first calendar quarter of 1945 is 61/4 tons.

(2) Small newspapers. During the third calendar quarter of 1945 and in each calendar quarter after that, any person may use or cause to be used 5 tons of print paper for a newspaper published weekly or less frequently, 61/4 tons of print paper for a newspaper published semi-weekly, 7½ tons of print paper for a newspaper published tri-weekly, 8¾ tons of print paper for a newspaper published four times a week, 10 tons of print paper for a newspaper published 5 times a week, 111/4 tons of print paper for a newspaper published 6 times a week, or 12½ tons of print paper for a newspaper published 7 times a week. It makes no difference whether he used that much print paper or any print paper in the publication of a newspaper during any previous period.

(3) Other newspapers using less than 25 tons per quarter. If, prior to October 1, 1944, a publisher used less than 25 tons of print paper per calendar quarter for civilian readers (whether or not he used additional paper for military readers), his total quarterly consumption quota for all types of readers shall be

computed as follows:

(i) Ascertain the total number of copies of all issues printed in each of the seven calendar quarters between January 1, 1943 and September 30, 1944.

(ii) Ascertain the average number of pages per issue printed in each of the seven calendar quarters between January 1, 1943 and September 30, 1944.

(iii) Multiply the highest quarterly figure determined under subdivision (i) by the highest quarterly figure determined under subdivision (ii). The weight of paper required to produce this number of pages is the publisher's quarterly consumption quota; Provided, however. That if this figure is in excess of 25 tons, the publisher shall be limited to 25 tons per quarter plus the tonnage in excess of 25 tons which he used for military circulation in the third quarter

(n) Allotment to Army and Navy. (1) The War Production Board may from time to time allot to the Army and the Navy a specified tonnage of paper to be consumed in printing (i) newspapers acquired in bulk for free distribution by the Army or the Navy which will be furnished to United States Armed Forces personnel in the continental United States and (ii) "servicemen's" "overseas", "pony", or other condensed editions of newspapers acquired in bulk by the Army or the Navy which will be furnished to United States Armed Forces personnel overseas.

(2) From this allotment the Army and the Navy, under a delegation of authority from the War Production Board, may grant to individual publishers the right to add to their consumption quotas the tonnage of paper consumed in printing such newspapers acquired by the Army and the Navy for distribution as described under paragraph (n) (1). This allotment does not cover purchases of newspapers by military exchanges or service departments as defined in Priorities Regulation 17 for distribution within the continental limits of the United States. All newspapers sold to the military shall be charged against the publisher's consumption quota unless the publisher has received a specific grant from the Army or the Navy pursuant to this paragraph.

# Delivery Quota

(o) Computation of delivery quota. In July 1945, and in each calendar month after that, no publisher may order or accept delivery of print paper in excess of his monthly delivery quota, which shall be computed in accordance with the following instructions:
(1) Monthly base. Total the pub-

lisher's consumption quotas for the third and fourth quarters of 1945 and add the ex-quota tonnage, if any, which may have been granted for the third quarter of 1945. Divide by 6. (Do not add any carry-over from preceding quarters.)

(2) Inventory ceiling. The above amount shall be reduced accordingly if a publisher's inventory is, or by virtue of such order or acceptance will become, on December 31, 1945, greater than: (i) 30 days' supply for publishers in the states named in List A, (ii) 50 days' supply for publishers in the States named in List B, or (iii) 60 tons for publishers who would be limited to a smaller amount by subdivision (i) or (ii) above.

# List A

Nebraska. Connecticut. District of Columbia. Delaware. Indiana. Iowa. Kansas. Kentucky. Maryland. Massachusetts. Michigan. Minnesota. Missourl.

New Hampshire. New Jersey New York. North Dakota Ohio. Pennsylvania, Rhode Island. South Dakota. Vermont. Virginia. West Virginia. Wisconsin.

# List B

Nevada. Alabama. New Mexico. Arizona. North Carolina. Arkansas. Oklahoma. California. Oregon. South Carolina. Colorado. Florida. Tennessee. Georgia. Texas. Idaho. Louisiana. Utah. Washington. Montana. Wyoming. Mississippi.

In computing 3. Exclusions. monthly base under paragraph (o) (1), and in computing the maximum tonnage which he may have in his inventory on December 31, 1945 in accordance with paragraph (o) (2), a publisher shall exclude any less-than-quota savings under his consumption quota carried over from

previous quarters. He shall also exclude print paper which he has received by Great Lakes or coastal water-borne shipments; provided on May 1 of any calendar year he shall have on hand or available for use not more than (i) a 30 days' supply if he is located in one of the States named on List A above, or (ii) a 50 days' supply if he is located in one of the States named in List B above and provided further that no publisher may order or accept delivery of a total amount of print paper by water, rail or otherwise in any calendar year (including both the open and closed navigation seasons) in excess of his permitted consumption for that calendar year.

(4) Computation of rate of consumption. The number of days' supply shall be computed at the average daily rate of allowable consumption for the last six

months of 1945.

(5) Fractional carloads. If a publisher's delivery quota for any month is less than one carload, he may nevertheless order and accept, in that month, up to one full carload. If a publisher's delivery quota for any month is a whole number of carloads plus a fraction of another carload, the fraction may be added to his delivery quota for any suc-

ceeding month.

(6) Transit damage. If print paper in inventory is destroyed or damaged to such an extent that it becomes unusable in publishing his newspaper, whether this occurs while the paper is in transit or after it has reached its destination, the publisher may increase his delivery quota (but not his consumption quota) in the same or any subsequent month by an amount sufficient to replace such paper. It is immaterial whether or not the publisher is reimbursed for the destroyed or damaged paper by the shipper, the carrier, or an insurance company. It is also immaterial whether or not the publisher salvages all or part of the damaged paper for use other than in publishing his newspaper.

(7) Report on transit damage. publisher who increases his delivery quota to replace destroyed or damaged print paper in accordance with subparagraph 6 above shall, within 15 days after placing the order for such replacement, file a letter with the War Production Board stating the number of tons comprising the publisher's delivery quota for that month, the number of tons destroyed or damaged, the manner in which such print paper was rendered unfit for use in publishing his newspaper, and the number of tons ordered in excess of his delivery quota. This reporting requirement has been approved by the Bureau of the Budget in accordance with the Federal

Reports Act of 1942.

(p) Exceptions. Permission to order or accept delivery of print paper in excess of the tonnage allowed under paragraph (o) may be granted by the War Production Board upon a written request for specific authorization stating the number of tons and the number of days' supply of print paper which the publisher has in inventory, the number of tons comprising his delivery quota, the number of additional tons he desires to order and accept, and the reasons why

the denial of the request would create undue hardship.

(q) Certification. No mill or other supplier may sell or deliver to any person. and no person may accept, any print paper for use under Order L-240 except on a delivery order bearing or accompanied by a certification substantially in the form set forth below. This certification must be signed manually or as provided in Priorities Regulation No. 7 by the purchaser or by an official duly authorized for such purpose:

The undersigned certifies, subject to the penalties of section 35 (a) of the U.S. Criminal Code, to the seller and to the War Production Board; (a) that he is permitted to place this delivery order and to accept the print paper ordered; (b) that the print paper will be used or delivered, or that it is required to replace in inventory print paper previously used or delivered, under War Production Board Order L-240.

The above certification must be placed on, or must accompany, each delivery order placed by any person for print paper to be used under Order L-240, and the certification provided for in Priorities Regulation No. 7 may not be used in its place.

(r) Inventory reports and copies of orders. On and after July 1, 1945, the publisher of every newspaper which consumes 25 tons of print paper or more in any calendar quarter shall file with the War Production Board:

(1) A monthly statement of his inventory of print paper on Form WPB 4292 within three days after the close of each month, beginning with June 1945.

(2) Copies of all orders for the delivery of print paper placed by him or for his account. Such copies of orders must be mailed within three days after the orders are placed.

These reporting requirements have been approved by the Bureau of the Budget in accordance with the Federal

Reports Act of 1942.

(s) Intra-company transfers. foregoing restrictions apply not only to deliveries from one person to another, including affiliates and subsidiaries, but also to deliveries from one branch, division, or section of a single enterprise to another branch, division, or section of the same or any other enterprise under common ownership or control.

# Miscellaneous Provisions

(t) Loans of print paper. Any loan of print paper made by a publisher shall be reported to the War Production Board by letter within 15 days after the date of the loan. This reporting requirement has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(u) Applicability of regulations. This order and all transactions affected by it are subject to all present and future regulations of the War Production Board.

(v) Appeals. Any appeal from the provisions of this order shall be made in accordance with Supplement 1 to the order. Regardless of the provisions of Priorities Regulation 16 no statement with respect to manpower information on Form WPB-3820 (or letter explaining why that form is not filed) need accompany any appeal.

(w) Communications to the War Production Board. All reports required to be filed hereunder, requests for specific authorization, appeals and other communications concerning this order shall be addressed to: War Production Board. Printing and Publishing Division, Wash-

ington 25, D. C. Ref: L-240.
(x) Violations. Any person who willfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assist-

#### INTERPRETATION 4

#### TRANSIT DAMAGE

Paragraph (f) of Order L-240 states in part: "Transit damage shall not be included in a publisher's 'use' of print paper." provision which was inserted in the order on December 24, 1943, merely explained, and did not change, the existing rule.

At all times since the issuance of Order L-240 on December 31, 1942, a publisher has

been obliged to charge against his consumption quota only the print paper which was actually "used" in publishing his newspaper; print paper which was destroyed or damaged in transit need not be charged against the publisher's consumption quota to the extent that such print paper was rendered unusable in the publication of his newspaper. However, at all times since the issuance of Order L-240 on December 31, 1942, production waste has been included in the tonnage of print paper which is "used" in publishing a newspaper. (Issued Oct. 30, 1944.)

PART 3133-PRINTING AND PUBLISHING [Limitation Order L-244, Supp. 1, as Amended Aug. 3, 1945]

# MAGAZINES AND PERIODICALS

§ 3133.15a General Limitation Order L-244, Supplement No. 1-(a) Purpose of appeal clause. The serious shortage in the supply of print paper available for magazines makes it necessary for publishers to reduce their consumption substantially, as provided in Order L-244. Such reductions may create serious hardships—which, however, are unavoidable in time of war. Appeals are not granted to ameliorate, in individual cases, hardships applicable to an entire industry. They are granted only to provide relief, subject to the provisions of paragraphs (b) to (g), from certain undue and excessive hardships which would be created if the order were applied without modification to an exceptional set of circumstances. Appeals which do

not establish such hardships shall be denied.

(b) No automatic adjustments. Paragraph (f) of this supplement describes the types of hardship for which quota adjustments shall be made by the War Production Board on appeal. These adjustments, however, are not automatic. A publisher who believes that his case is covered by one of the subparagraphs of paragraph (f) may not make his own adjustment of his consumption quota. No publisher may use any paper in excess of his consumption quota, computed in accordance with paragraphs (j) and (k) of Order L-244, unless he files an appeal for such relief and a grant is made in writing, signed by the Recording Secretary of the War Production

(c) Adjustment of base tonnages. Wherever appropriate, grants on appeal shall be made in the form of adjustments of a publisher's base tonnage which shall continue to be effective in future quarters, subject to re-examination and modification at any time by the War

Production Board.

(d) Effective date of base tonnage adjustments. Adjustments of base tonnages are not retroactive. A publisher whose base tonnage is adjusted on appeal does not receive, by virtue of such adjustment, a "carry-over of unused tonnage" from any quarter before the issuance of the appeal grant.

(e) Application of curtailments. Constructive base tonnages granted on appeal are subject to the curtailments required by paragraph (j) of Order L-244

as amended from time to time.

(f) Types of hardship for which relief shall be granted. In passing upon appeals under Order L-244 the following

standards shall govern:

(1) New magazines issued by new publishers in 1942. If a new publisher first caused paper to be used in printing a new magazine in 1942 (and did not publish any other magazine throughout that entire year) he shall be granted a constructive base tonnage: Provided, The magazine was published continuously until the issuance of Order L-244 on December 31, 1942. This shall be determined by averaging the tonnage of paper consumed in each issue printed in 1942 and multiplying this average tonnage by a factor representing the magazine's established frequency of issuance.

(2) Publishers who used 25 tons or less in the first quarter of 1943. If a publisher used 25 tons of paper or less in the first quarter of 1943 under that provision of Order L-244 (eliminated as of April 1, 1943) which exempted users of 25 tons per quarter or less, he shall be granted a constructive base tonnage, not to exceed 25 tons per quarter. This shall be determined by averaging the tonnage of paper used in the issues of each magazine printed during the first quarter of 1943 and multiplying this average tonnage by a factor representing the magazine's established frequency of issuance in that period.

size. Publishers who reduced the basis weight or trim size of their magazines in 1942 shall be granted compensatory in-

(3) Reduction in basis weight and trim creases in their base tonnages.

(4) Heavy weight paper, wide rolls and large sheets held in inventory because of reduction in basis weights and trim size. (i) A publisher who, prior to October 1, 1944, reduced the basis weight of the paper regularly used in his magazine, and who, since the time of such reduction, has held in "frozen inventory" a quantity of the heavier paper regularly used prior to such reduction, shall, on appeal, be granted permission to consume that quantity of heavier paper and charge it against his quota as if it were paper of the basis weight he was using on October 1, 1944 for the same kind of printing. Such permission shall be granted only subject to the following conditions:

That the heavier weight paper shall be consumed before September 30, 1945, and

That the tonnage of paper which he is permitted to accept during the third quarter of 1945 shall be reduced by the net tonnage to be charged against his consumption quota pursuant to the appeal granted under this paragraph.

(ii) A publisher who reduced the trim size of his magazine prior to October 1, 1944, and who, since the time of such reduction, has held in "frozen inventory" a quantity of wider rolls or larger sheets of paper which were required to print his magazine prior to such reduction in trim size, shall, on appeal, be granted permission to consume that quantity of over-size rolls or sheets as if it were paper of the size he was using on October 1, 1944 for the same kind of printing without charging against his consumption quota the trim waste caused by such reduction in roll size or sheet size. permission shall be granted only subject to the following conditions:

That such over-size rolls or sheets shall be consumed before September 30, 1945, and

That the tonnage of paper which he is permitted to accept during the third quarter of 1945 shall be reduced by the net tonnage to be charged against his consumption quota pursuant to the appeal granted under this paragraph.

(5) Unusual seasonal variations. Publishers whose schedules have unusual seasonal variations shall be granted permission to redistribute their quarterly consumption quotas within a calendar year.

(6) Inter-company transfers. Transfers of quotas under Order L-244 shall be permitted between corporations which have occupied the relationship of parent and wholly-owned subsidiary, or affiliates wholly owned by the same person prior to December 31, 1942, and continu-

ously thereafter.

(7) Temporary suspension. Publishers who suspended publication temporarily before the issuance of Order L-244 on December 31, 1942 because of strikes, fires, entrance into the armed forces, or similar conditions shall be granted compensatory increases in their base tonnage to the extent that it was impracticable to continue operations.

(8) Extraordinary hardships. Appeal tonnage shall not be recommended by either the administrator or the Division

Appeals Committee or granted by the Appeals Board for causes other than those enumerated in subparagraphs (1) to (7) of this paragraph (f) except where unforeseen, unusual, extraordinary or emergency conditions constituting undue and excessive hardship are proved. Certain factors which shall not be recognized as grounds for the granting of appeal tonnage are described in paragraph (g).

(g) Factors which shall not be considered as grounds for granting of tonnage on appeals. The following is a list of some of the factors which shall not be considered as grounds for the grant-ing of appeals. This list is not ex-

 The nature of a magazine's contents.
 Diminished base period consumption because of financial conditions.

(3) Suspension of publication before the issuance of Order L-244 on December 31, 1942, except as provided in paragraph (f) (7).

(4) Consumption of more paper in any quarter of 1942 than in other quarters.

(5) Consumption of less paper in 1942 than in other years except as provided in para-

graph (f) (3).
(6) Decrease in circulation, number of advertising pages, or number of editorial

pages in 1942.

(7) Increase in trim size, basis weights, circulation, cover or subscription price, number of advertising pages, number of editorial pages, frequency of issuance, or other ex-pansion measures in 1942 or thereafter.

(8) Publication of a new magazine in 1942 by a publisher who was in the magazine publishing business throughout that year.
(9) Special events such as war bond drives,

recruiting drives, war news, political news,

(10) Inability to maintain or increase advertising pages, editorial pages, or circulation under existing quotas.

(11) Increased demand for a magazine, even though it is published by a membership organization whose constitution requires that a copy be sent to every member. (12) Request to use in a new magazine

publishing business more than the tonnage provided in paragraph (j) (5) of Order L-244.

(13) The fact that additional tonnage was granted on appeal to a competitor.

(14) Consumption of paper in violation of Order L-244, whether or not such violation was wilful.

# Procedure

(h) How appeals are submitted. peals from Order L-244 may be filed by addressing a letter to the War Production Board, Printing and Publishing Division, Washington 25, D. C. Ref: L-244.

(i) Form of appeals. The letter of appeal need not follow any particular form. It should state informally, but completely, the particular provision appealed from, the precise relief desired, the subparagraph of paragraph (f) upon which the appellant relies, and the reasons why denial of the appeal would result in undue and excessive hardship.

(j) Denial by administrator. Appeals may be denied in the first instance by the

administrator of the order.

(k) Re-appeal from denial by administrator. When an appeal has been denied by the administrator of the order, the appellant may re-appeal, within 15 days after the letter of denial is mailed, by addressing a letter to the War Production Board, Printing and Publishing Division, Washington 25, D. C. Ref: L-244. This letter may contain simply a request that the case be forwarded to the Appeals Board of the War Production Board. Any additional information which the appellant cares to submit at this time will also be forwarded to the Appeals Board.

(1) Grant of appeals. Although the administrator of the order may deny an appeal in the first instance, only the Appeals Board has the power to grant relief in individual cases from the provisions

of the order.

# Chapter XVIII—Office of Economic Stabilization

[Directive 72]

PART 4003—SUPPORT PRICES, SUBSIDIES

CALIFORNIA RAISIN AND GRAPE PROGRAM 1945-46 MARKETING SEASON

The War Food Administrator in a letter dated May 12, 1945, and the Price Administrator in a letter dated May 18, 1945, submitted certain information and their recommendations to me relative to a California raisin and grape program for the 1945-46 marketing season. In approving a program along the general lines recommended, I find it necessary to issue this directive to effectuate the purposes of the Emergency Price Control Act of 1942, as amended, the Stabilization Act of 1942, as amended, and Executive Orders Nos. 9250 and 9328.

A. I hereby find that:

(1) The following producer prices for natural condition raisins are above the legal minimum amounts required to be reflected in maximum prices for processed commodities by section 3 of the Stabilization Act of 1942, as amended, and are necessary to insure the maximum necessary production of raisins in 1945 to meet essential requirements:

	Producer prices
Types	for 1945
Sultana, Natural	\$190.00
Thompson Seedless:	
Natural	190.00
Golden Bleached:	
Choice	230.00
Extra Choice	240.00
Fancy	250.00
Soda Bleached (choice)	210.00
Sulphur Bleached (fancy	7) 240.00
Natural	205.00
Valencia	257.00
Cluster	220.00
Zante Currants	250.00

(2) Maximum prices on sales of natural condition raisins by producers to processors are not now necessary to promote the national defense.

(3) Maximum prices on sales of California grapes for table use and for home crushing at levels based upon \$57.10 per ton packing house door basis with a cushion not exceeding \$18.00 per ton are necessary to promote the national defense

(4) Maximum prices on sales of wine, brandy, and other alcoholic products produced from California grapes should be revised to the extent necessary to reflect a return to producers of the 1945 crop of such grapes, in line, as nearly as practicable, with the return to be realized by raisin producers under the prices specified in paragraph A (1) hereof but in no event in excess of \$60.00 per ton, and that such revision will promote the national defense.

(5) The maintenance of approximately the present average level of maximum prices on sales of processed raisins to purchasers other than government procurement agencies, and other than for export, through the use of funds of Commodity Credit Corporation will effectuate the purposes of the hold-the-line policy; and

(6) Maximum prices on sales of processed raisins by processors for shipment to destinations or ports within Territories and Possessions of the United States at the same level as that applicable to sales by processors to purchasers other than government procurement agencies and other than for export to destinations and ports outside Territories and Possessions of the United States, through the use of funds of Commodity Credit Corporation will promote the national defense.

B. The Office of Price Administration is authorized and directed to:

(1) Revoke present maximum prices governing sales of natural condition raisins by producers to processors.

(2) Establish maximum prices governing sales of California grapes for table use and for home crushing at levels based upon \$57.10 per ton packing house door basis with a cushion not exceeding \$18.00 per ton.

<sup>1 10</sup> F.R. 48, 776, 924.

<sup>2 10</sup> F.R. 2521, 2875, 3223, 3549, 3556.

<sup>19</sup> F.R. 14827.

(3) Revise present maximum prices on sales of wine, brandy, and other alcoholic products produced from California grapes to the extent necessary to reflect a return to producers of the 1945 crop of such grapes, in line, as nearly as practicable, with the return to be realized by raisin producers under the prices specified in paragraph A (1) hereof, but in no event to exceed \$60.00 per ton.

(4) Revise present maximum prices governing processors' sales of processed

raisins to:

(a) Government procurement agencies, and to purchasers for export to destinations or ports outside Territories and Possessions of the United States, on the basis of the cost and profit study relative to processors' margins now being made by Office of Price Administration so as to reflect the producer prices specified in paragraph A (1) hereof; and

(b) Purchasers other than government procurement agencies, and other than for export to destinations or ports outside Territories and Possessions of the United States, on the basis of appropriate compensation for any increase in the legal minimum producer prices for 1945 above the respective legal minimum prices for 1944 and subject to such adjustments which the cost and profit study relative to processors' margins, now being made by the Office of Price Administration, may indicate.

(5) Furnish to the Secretary of Agriculture the revised maximum price, specified in paragraph B (4) hereof, for use by the Secretary of Agriculture in determining the appropriate rate of

subsidy payment.

C. The Department of Agriculture is authorized and directed to subsidize processors' sales of processed raisins (other than Cluster Muscats and Zante Currants) to purchasers other than government procurement agencies and other than for export to destinations or ports outside Territories and Possessions of the United States, through use of funds of Commodity Credit Corporation, so as to enable such processors to pay the producer prices specified in paragraph A (1) hereof and to sell such processed raisins at applicable maximum prices to be established by the Office of Price Administration pursuant to paragraph B (4) hereof. The appropriate rate of subsidy shall be determined by the Department of Agriculture after completion of the cost and profit study relative to processors' margins which is now being made by the Office of Price Administration and the maximum prices based upon such study have been issued by the Office of Price Administration.

(E.O. 9250 and E.O. 9328, 3 CFR Cum, Supp. pp. 1213, 1267)

Issued and effective this first day of August, 1945.

Thomas I. Emerson, Acting Economic Stabilization Director.

Chapter XX—Office of Contract Settlement

[Reg. 14, Amdt. 2]

Part 8004—Termination Cost Memorandums

FIXED-PRICE SUPPLY CONTRACTS

Part 8014 (10 F.R. 2312 and 3925) is redesignated as Part 8004 and §§ 8014.1 through 8014.9 are redesignated as §§ 8004.1 through 8004.9.

Pursuant to section 2 of Regulation No. 14 of this Office, Regulation No. 14 is hereby amended to incorporate Termination Cost Memorandums Nos. 10 through 15 which are hereby issued as a part of such regulation.

§ 8004.10 Engineering and development, special tooling, and preparatory expenses—(a) Reference to Statement of Cost Principles. (1) The statement provides for the inclusion of the costs of engineering and development and of special tooling as follows (subpar, 1 (e));

Engineering and development and special tooling. Costs of engineering and development and of special tooling; Provided, That the contractor protects any interests of the Government by transfer of title or by other means deemed appropriate by the Government.

(2) Engineering and development and special tooling are included among the costs subject to limitation under subparagraph 1 (i) of the Statement of Cost Principles (see § 8004.5).

(3) Although the statement does not refer in specific terms to preparatory expenses, their recognition is inherent in the general statement of costs included

therein.

(b) Definitions. (1) The term "engineering and development", as used herein, refers to the design of the product, the detailed engineering specifications, the design of special tooling, the planning of production processes and layout, and related functions performed specially for the contract, or the contract and other war production contracts.

(2) The term "special tooling" includes jigs, dies, fixtures, moulds, gauges, and other similar equipment acquired or produced by the war contractor specially for the war contract or for the contract and other war production contracts. The term does not relate to buildings, building, equipment, and machine tools; nor to tools such as cutting tools and hand tools which usually lose their utility through wear and tear rather than through obsolescence.

(3) The term "preparatory expenses" refers to expenses incurred in preparing to operate specially under the contract, or the contract and other war production contracts. It includes the reasonable costs of plant rearrangement and alterations, organization, planning, and similar activities carried on specially for the contract, or the contract and other war production contracts. It does not include special facilities or initial costs, which are the subjects of other cost memorandums (see §§ 8004.7 and 8004.9).

(4) The phrase "other war production contracts", as used in subparagraphs (1), (2), and (3) of this paragraph, refers only to such war production contracts as were in existence at the time the special tooling was acquired or the costs of engineering and development or preparatory work were incurred; or such contracts as were at that time so certain to be entered into that the costs of this character could reasonably have been incurred for them, as well as for the terminated contract. For purposes of this section, time of acquisition means the date an order was placed or the date of authorization of work or construction by the contractor.

(c) Interpretations. (1) The basis for the inclusion of costs of engineering and development, special tooling, and preparatory work is the amount of such costs which, if the contract had not been terminated, would have been properly chargeable to the terminated portion of the contract (see subparagraph (3) of this paragraph. In this respect the accounting treatment used by the contractor in his books and records is not necessarily controlling. However, when costs of the nature discussed in this section are included, additional depreciation or amortization of the same items will be

excluded.

(2) Special tooling and similar items covered by this section will ordinarily become obsolete at the termination of the contract and, consequently, their only residual value will usually be as scrap. If the tooling or other items are retained by the contractor or sold to a third party, their retention value or the proceeds of any sale should be treated as a disposal credit in the contractor's settlement proposal and not as a reduction of the cost of the special items subject to amortization. Where the rate of amortization takes into account the Where the rate continuing war production contracts for which the costs were incurred, the disposal credit should not include the value of the tooling or other items to the contractor for use on such other work but only their ultimate disposal value. However, where the disposal value consists only of scrap and it has been the contractor's consistent practice to credit all tool scrap to overhead, such practice will be acceptable without applying the scrap value as a disposal credit.

(3) Ordinarily, the unit quantities of deliveries will be an acceptable basis for the allocation of the costs of engineering and development, special tooling, and preparatory work (i) to the terminated contract where more than one contract is involved and (ii) between the completed and terminated portions of the contract. However, if the contract or contracts include products of a diverse nature, some other equitable basis may be used, such as machine or

labor hours.

(4) Particular care should be taken to determine that tooling and other costs are special as defined herein. The bid proposal or other records relating to the negotiation or performance of the contract, which may indicate whether the costs were contempleted by the parties, are important, but not necessarily controlling, evidence that the tooling or other property was acquired or the work done specially for the contract or for the contract and other war production contracts. In the absence of such specific evidence, other satisfactory evidence will be required. In no case will the contractor's unsupported assertion on this point be considered sufficient, and a representation by the contractor at the time the contract was negotiated that it did not need special tooling or other items for its performance will indicate that such acquisition or cost was not contemplated.

(5) In most cases it will not be desirable for the Government to take title to special tooling and similar items covered by this memorandum. Generally, the contractor should be permitted to retain the items, and the contracting agency should protect the Government's

interests:

(i) By taking into consideration, in determining the rate of amortization, the use of the special tooling or other items on other war production contracts of the contractor; and

(ii) By obtaining a proper disposal credit in the settlement agreement, as provided by paragraph (c) (2) above;

and-

(iii) Where there is a possibility that the tooling or other items may be needed for Government purposes within a reasonable period, by appropriate arrangements for the use of such items.

§ 8004.11 Settlement expenses and costs of protection and disposition of property—(a) Reference to Statement of Cost Principles. The statement provides for the inclusion of settlement expenses and costs of protection and disposition of property as follows (subpars. 1 (k) and (l)):

Settlement expenses. Reasonable accounting, legal, clerical, and other expenses necessary in connection with the termination and settlement of the contract and subcontracts and purchase orders thereunder, including expenses incurred for the purpose of obtaining payment from the Government only to the extent reasonably necessary for the preparation and presentation of settlement proposals and cost evidence in connection therewith.

Protection and disposition of property.
Storage, transportation and other costs incurred for the protection of property acquired or produced for the contract or in connection with the disposition of such property.

(b) Definitions. (1) The costs and expenses covered by subparagraphs 1 (k) and (1) of the Statement of Cost Principles include such items as are incident to effecting terminations, termination settlements, and the protection and disposition of property acquired or produced for the contract and on hand at the date of termination. They do not include: (i) the costs of idle equipment, facilities, and personnel and (ii) accounting, legal, clerical, and other costs and expenses incurred in any appeal, either within a contracting agency or to the Appeal Board of the Office of Contract Settlement, or in any arbitration, mediation or suit in court, where such proceeding is instituted for the purpose of obtaining payment in excess of the amount the Government has determined to be due. Nothing herein shall be deemed to preclude recovery of the reasonable costs and expenses of settling termination claims of subcontractors related to the terminated portion of any war contract.

(2) The costs of preservation and protection of termination inventory include the necessary greasing, packing, and any other special treatment accorded termination inventory to insure the maintenance of its condition as well as the cost of special precautions necessary to insure its safety. Such costs should be distinguished from storage of termination inventory, the cost of which may include (i) amounts actually paid or payable to outside parties and (ii) a reasonable allocation of the contractor's own costs.

(c) Interpretations. (1) To the extent practicable, the costs and expenses covered by this section should be segregated and charged directly to particular terminated contracts. However, where direct charging is not practicable, any method of allocating these expenses may be used which produces results consistent with the principles set forth in subparagraph (3) of this paragraph. The method used may be based on estimates in the light of past experience and reasonably anticipated future terminations. In the absence of a more appropriate basis of allocation, expenses not charged directly may be allocated to particular terminated contracts by the application of a properly computed rate to the amount of the contractor's own costs included in the settlement proposals.

(2) Settlement expenses and costs of protection and disposition of property may include a properly allocable portion of the costs, including overhead, of special termination units or departments and regularly established organizational units. In such cases, it is not necessary that the expenses of such units or departments be identified with specific contracts, but the services performed must be directly related to termination activities. Factory and administrative overhead may be included as a settlement expense only to the extent that the elements of such overhead are properly allocable to such termination units or departments.

(3) Whatever method is used to allocate settlement and property expenses, the cumulative amount included for these expenses in all termination settlements to date should not exceed the cumulative total of such expenses actually incurred, and the total amount included in any single termination settlement proposal should not exceed an amount reasonably necessary to settle the contract

in question.

(4) The cost of microfilming or preserving records of a war contractor will ordinarily be classified as general and administrative expense and should not be included as a direct settlement expense in a termination settlement.

(5) Regulation No. 10 of this Office relates to the clearance of termination inventory from plants of war contractors. Section 4 of that regulation pro-

vides for reimbursement of the costs thereof as follows:

Contractor's right to store at his own risk. A war contractor may at any time remove from his plant and store on his own premises or elsewhere any of the above materials at his own risk. The war contractor will use reasonable care in the transportation and preservation of materials or removed and stored, and will comply with any directions or specifications covering removal, preservation, transportation and storage which may be issued by the contracting agency. The war contractor is entitled to be reimbursed for the reasonable cost of (i) necessary or appropriate transportation, preservation, protection and storage, and (ii) compliance with any directions or specifications in connection therewith issued by the contracting agency. Ordinarily, charges for storage of termination inventory prior to the experiation of the plant clearance period will not be deemed a reasonable settlement expense.

(6) Section 5 of Regulation 10 provides for the removal and storage of termination inventory after the 60-day plant clearance period as follows:

Contractor's right to remove or store at Government expense and risk. If the contracting agency fails to arrange for storage by the war contractor or to remove any termination inventory within 60 days after its receipt of a satisfactory inventory schedule (or within such longer period as the contractor may agree), the contractor may remove and store at the Government's expense and risk, any or all those materials remaining, using reasonable care in the transportation and preservation of materials so removed and stored. The words "at the Government's expense and risk" mean, among other things, that the contractor is not required to insure such materials.

(7) In accordance with the foregoing references, the contractor may include in its settlement proposal the reasonable and necessary costs of transportation, preservation, and protection of termination inventory, regardless of whether such costs are incurred prior or subsequent to the expiration of the 60-day plant clearance period.

(8) Charges for storage of termination inventory may ordinarily be included only for the time following the 60-day plant clearance period. However, if the 60-day period is unreasonable in a particular case, the cost of storage of termination inventory prior to the expiration of such period may be included.

§ 8004.12 Depreciation—(a) Reference to Statement of Cost Principles. The statement provides for the inclusion of depreciation as follows (subpar. 1 (c)):

Depreciation. An allowance for depreciation at appropriate rates on buildings, machinery, and equipment, and other facilities including such amounts for obsolescence due to progress in the arts and other factors as are ordinarily given consideration in determining depreciation rates. Depreciation as defined herein shall not include loss of useful value of the type covered by subparagraph (1).

(b) Definition. The term "depreciation" is used herein in the usual commercial accounting sense to denote that part of the cost of a fixed asset which is charged to a particular period on the basis of distributing its cost over its estimated useful life. It should be distinguished from amortization of special

tooling and loss of useful value of special facilities, which are separately provided for in subparagraphs 1 (e) and (f) of the Statement of Cost Principles (see §§ 8004.9 and 8004.10), as well as from amortization of emergency facilities under section 124 of the Internal Revenue Code.

(c) Interpretations. (1) To be includible as a cost of a terminated contract, depreciation must have accrued during the performance of the contract and be chargeable to the work done thereunder in accordance with accepted methods of accounting allocation. Any recognized method of computing depreciation may be used and where the contractor has consistently employed a recognized method, it will be expected to continue to use such method. Depreciation shall be includible only in respect of facilities owned by the contractor.

(2) Depreciation should ordinarily be computed at the rates customarily used by the contractor, which may reflect accelerated depreciation if the contractor can demonstrate the reasonableness of such accelerated rates in the light of unusually intensive or abnormal use of the related assets. The depreciation rates used by the contractor for Federal income tax purposes will ordinarily be acceptable, although they are not con-

trolling.

- (3) The fact that a facility is amortized at a rate of 20 percent per annum pursuant to section 124 of the Internal Revenue Code is not significant in determining the rate of depreciation to be used for purposes of contract termination. However, buildings, facilities, and tooling not qualifying for the special treatment accorded under subparagraphs 1 (e) and (f) of the Statement of Cost Principles may in some cases be amortized at higher rates than ordinary depreciation where such assets have a high rate of obsolescence due to their special nature or utility primarily for war production.
- (4) Consistency from year to year in the method and rates of depreciation used is a significant factor in determining the appropriateness of the charge for depreciation in a particular accounting period. Therefore, any deviation from book depreciation, such as to reflect current depreciation on assets fully depreciated on the books, will raise a question as to the propriety of the depreciation charges as a whole.
- § 8004.13 Advertising expense—(a) Reference to Statement of Cost Principles. (1) The statement provides for the inclusion of advertising expense as follows (subpar. 1 (h)):

Advertising. Advertising expense to the extent consistent with a prewar program or to the extent reasonable under the circumstances.

(2) Advertising expense is included among the costs subject to limitation under subparagraph 1 (i) of the Statement of Cost Principles (see § 8004.5).

(b) Definition. The term "advertising expense," as used herein, includes the expense of operating an advertising department within the contractor's organization as well as expense incurred in the use of advertising media.

- (c) Interpretations. (1) Where advertising expense represents a nominal amount in relation to the operations and other expenses of the contractor, the entire amount may be classified with general, administrative, and distribution expenses and allocated to the terminated contract in accordance with § 8004.2. Otherwise, it should be treated in accordance with the principles set forth below.
- (2) The amount of advertising expense properly allocable to Government sales should be measured by its consistency with the contractor's prewar program unless such program does not provide an adequate basis for comparison, as in the case of newly organized companies. Where the consistency basis is not applicable, the reasonableness of the amount of advertising expense to be included in the settlement proposal will be determined in the light of the circumstances of each case.

(3) Where the allowable advertising expense is determined by reference to a prewar program, consideration may be given to the following factors:

(i) The period used to measure the prewar program may represent the four calendar years 1936 to 1939, inclusive, or the most nearly equivalent fiscal years. If the contractor was not in business during this entire period any representative period during which it was in business during such years may be used.

(ii) Advertising chargeable to the period of operation under the contract in excess of the average dollar amount for the prewar period should not be included in the amount to be allocated between Government contracts and other busi-

ness.

(iii) The contractor's non-war business for the period of the contract should first be charged with advertising up to the prewar percentage of sales. In other words, to the extent that the contractor's prewar business has been maintained, no advertising should be charged to Government contracts.

(iv) Advertising should not be charged to Government contracts at a rate higher than the prewar percentage of sales.

- (v) The amount of advertising expense allocated to Government sales in accordance with the principles set forth herein may be allocated to the terminated contract on the basis of sales (the amount of the termination settlement to be treated as a sale), cost of sales, or on any other reasonable basis.
- § 8004.14 General experimental and research expense—(a) Reference to Statement of Cost Principles. (1) The statement provides for the inclusion of general experimental and research expense as follows (subpar. 1 (d)):

Experimental and research expense. General experimental and research expense to the extent consistent with an established prewar program, or to the extent related to war purposes.

- (2) Experimental and research expense is included among the costs subject to limitation under subparagraph 1 (i) of the Statement of Cost Principles (see § 8004.5).
- (b) Definition. The term "general experimental and research expense", as used herein, refers to expenses incurred

on projects of a basic and general nature and in the development of new products and processes, as distinguished from process engineering, tool development and similar activities related to particular contracts. The term does not refer to routine shop experiments in production methods and similar activities which are usually classified with factory overhead.

- (c) Interpretations. (1) If income from royalties or from the sale of patents or rights is derived from general experimental and research programs carried on currently or in the past, such income should be deducted from the amount of general experimental and research expense to be allocated to the terminated contract.
- (2) Where general experimental and research expense represents a nominal amount in relation to the operations and other expenses of the contractor, the entire amount may be classified with general, administrative and distribution expenses and allocated to the terminated contract in accordance with \$8004.2. Otherwise, it should be treated in accordance with the principles set forth below.
- (3) The amount of general experimental and research expense properly allocable to Government sales should be measured by its consistency with the contractor's prewar program unless such program does not provide an adequate basis for comparison, as in the case of newly organized companies. Where the consistency basis is not applicable, the amount of general experimental and research expense to be considered for apportionment between Government sales and other work will be limited to such expense as is related to war purposes.

(4) Where the allowable general experimental and research expense is determined by reference to a prewar program, consideration may be given to the fol-

lowing factors:

(i) The period used to measure the prewar program may represent the four calendar years 1936 to 1939, inclusive, or the most nearly equivalent fiscal years. If the contractor was not in business during this entire period, any representative period during which it was in business during such years may be used.

(ii) General experimental and reserch expense chargeable to the period of operation under the contract in excess of the average dollar amount for the prewar period should not be included in the amount to be allocated between Government contracts and other business.

(iii) The contractor's non-war business for the period of the contract should first be charged with the amount of general experimental and research expense up to the prewar percentage of sales. In other words, to the extent that the contractor's prewar business has been maintained, no amount of this expense should be charged to Government contracts.

(iv) General experimental and research expense should not be charged to Government contracts at a rate higher than the prewar percentage of sales.

(v) The amount of the expense allocated to Government sales in accordance with the principles set forth herein may be allocated to the terminated contract on the basis of sales (the amount of the termination settlement to be treated as a sale), cost of sales, or on any other reasonable basis.

§ 8004.15 Cash discounts on purchases—(a) Reference to Statement of Cost Principles. The statement does not refer in specific terms to cash discounts

on purchases.

(b) Definition. The term "cash discount on purchases", as used herein, refers to a reduction in the amount paid to a vendor for the purchase of any items included in a termination settlement, solely by reason of the payment therefor within a specified period. It should be differentiated from trade discounts, reduces, and other allowances, which are usually treated as a direct deduction from the purchase price of the items to

which they relate.

(c) Interpretations. (1) Cash discounts on purchases realized by the contractor in respect of items included in the termination settlement should be reflected as deductions from the contractor's costs included therein. Where it is not the contractor's usual accounting practice to deduct cash discounts from the individual purchases to which they apply, such as where the discounts are credited to income, the amount of cash discounts (estimated, if necessary) may be deducted in a single amount from the

entire inventory or other cost.

(2) Where it is the contractor's usual practice to credit cash discounts to factory overhead or to general and administrative expenses, such treatment will ordinarily be acceptable.

Under this order the OPA has established the method by which you, as a wholesaler, are to determine your ceiling prices for these garments

You are required by the OPA to determine your ceiling prices for the specified styles by the following method: You first find the "cost base" for the garment being priced from Column B of the following table. You then apply to this "cost base" your "initial percentage markup" (determined in accordance with the appropriate rule set forth in subparagraph (3) of § 1372.102 (b) of Maximum Price Regulation 210). You then find your new ceiling price by adding to the amount thus determined the amount specified in Column C below for the particular style of garment being priced.

Please note that, as a wholesaler, you are required by the OPA to transmit to each retailer to whom you deliver any of the garments listed above on or after August 1945, a "Wholesaler's Statement to Retailers of OPA Adjustment Charge" in the following form, properly filled in by you with the information applicable to the particular garments being delivered by you to the retailer. You are required to complete this statement as follows: In Column A you shall list the ceiling prices of the particular styles being shipped which were in effect for you under Maximum Price Regulation 210 prior to the date of this order. In Column B you shall list the new ceiling prices which you determine in accordance with the method indicated in this statement to you. In determining your ceiling prices for these garments the OPA has ruled that you must use as your "net cost" under MPR 580 or your "cost base" under MPR 210 the amount set forth in Column A above. You may not, in any case, include the amount of the OPA adjustment charge set forth in Column C above in determining your ceiling price for these garments under either of these regulations.

NEW YORK WATER SERVICE CORP. ET AL.

NOTICE OF FILING OF AMENDED PLAN, ORDER RECONVENING HEARING AND NOTICE OF RE-CONVENED HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pennsylvania, on the 1st day of August, A. D. 1945

In the matters of New York Water Service Corporation, Federal Water and Gas Corporation, File No. 59-35; Federal Water and Gas Corporation and Subsidiary Companies, (Respondents), File No. 59-61; Federal Water and Gas Corporation and Subsidiary Companies, File

No. 54-66. I. Notice is hereby given that New York Water Service Corporation, ("New York"), a subsidiary of Federal Water and Gas Corporation ("Federal"), a registered holding company, has filed an amended plan pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935 for the purpose of enabling New York to comply with the provisions of section 11 (b) of the act.

All interested persons are referred to said amended plan, which is on file in the office of this Commission, for a statement of the transactions therein proposed, which may be summarized as follows:

1. New York has presently outstanding \$13,606,000 principal amount of long term debt, 46,532 shares of \$100 par value 6% Cumulative Preferred Stock, and 26,015 shares of \$100 par value Common Stock. Federal owns all the Common Stock and no other securities of New York. At March 31, 1945, cumulative dividend arrears on the preferred stock aggregated \$3,780,725, equivalent to

\$81.25 per share.

2. Under the amended plan, each share of New York's 6% Cumulative Preferred Stock would be changed into and reclassified as one share of no par value common stock, with a temporary stated value of \$10 per share, pending final adjudication of the original cost of New York's properties. All rights of holders of the preferred stock to accumulated and unpaid dividends would be cancelled. The presently outstanding Common Stock of New York would be surrendered to New York and accorded no recognition in the recapitalization.

3. This Commission is requested to approve the amended plan, to order Federal to surrender to New York the certificates for all New York's presently outstanding Common Stock, and to apply to a District Court of the United States to enforce and carry out the terms and provisions of the amended plan.

4. The amended plan states that the order of the District Court enforcing and carrying out the provisions of the amended plan may provide, if this Commission shall so require and the Court approve, for the transfer of all the issued and outstanding preferred stock of the corporation by the transfer agent, without the written or other consent of the holders thereof, to an officer of the Court to be designated in such order to act as trustee or nominee for the holders of said preferred stock and to be authorized and directed, among other things, to vote said stock in favor of the amended plan and the amendment of the Certifi-Incorporation as provided cate of therein.

5. The amended plan provides for an application by New York to the Public Service Commission of the State of New York for an order approving the issuance of the proposed common stock, and further provides that the proposed amendment to the Certificate of Incorporation of New York will be presented to the Public Service Commission of the State of New York for endorsement of consent to the reduction in capital effected thereby and thereafter to the Secretary of State of New York for filing.

6. Expenses of carrying out the amended plan are estimated at \$19,772.

II. Proceedings instituted by the Commission pursuant to sections 11 (b), 15 (f), and 20 (a) of the act directed to Federal and New York (File Nos. 59-61 and 59-35) and proceedings in respect of a plan under section 11 (e) of the act filed by Federal and its subsidiaries (File No. 54-66) have heretofore been consolidated.

By order dated February 10, 1943, the Commission, in said consolidated proceedings under section 11 of the act, among other things, (1) ordered that New York shall take such steps as may be necessary to recapitalize so as to fairly and equitably distribute voting power among its security holders; Provided, That the common stock of New York owned by Federal shall be accorded no recognition in such recapitalization; (2) ordered that Federal shall take such action as may be necessary to divest itself of all interests held by it, directly or indirectly, in the business conducted and properties owned by New York; Provided, That such divestment shall not be effected through the sales of securities of New York owned by Federal prior to the recapitalization of New York in such manner as to provide for a fair and equitable distribution of voting power among security holders thereof; and (3) approved a plan filed by Federal and subsidiaries under section 11 (e) of the act, in which plan Federal consented to the provisions of the order described above relating to New York and to Federal's interest in New York.

New York has heretofore filed a plan of recapitalization pursuant to section 11 (e) of the act (File No. 54-66); a hearing was held in these consolidated proceedings in respect of said plan and was continued indefinitely.

III. It appearing to the Commission that notice should be given and that the hearing herein previously continued should be reconvened for the purpose of taking testimony in respect of said

amended plan;
It is ordered, That the hearing herein be reconvened under the applicable provisions of the act and the rules of the Commission thereunder on August 24, 1945, at 10:00 a. m., e. w. t., at the office of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania. On that date, the hearing room clerk in Room 318 will advise as to the room in which the hearing will be held.

It is further ordered, That Robert P. Reeder, or any other officer or officers of the Commission designated by it for that purpose, shall preside at the reconvened hearing. The officer so designated to preside at the hearing is hereby authorized to exercise all the powers granted to the Commission under section 18 (c) of the act and to a trial examiner under the Commission's rules of practice.

It is further ordered, That, without limiting the scope of the issues presented by these proceedings, attention will be directed at the hearing to the following

matters and questions:

1. Whether the amended plan, as proposed or as hereafter modified, is necessary to effectuate the provisions of section 11 (b) of the act, is fair and equitable to the persons affected thereby, and would effect compliance with the Commission's order herein dated February 10, 1943;

2. What terms and conditions, if any, should be imposed in the public interest or for the protection of investors or consumers in connection with the proposed issuance of 46,532 shares of new

common stock:

3. Whether the proposed reduction in the capital of New York is detrimental to the interests of New York's security holders:

4. Whether the proposed accounting entries in connection with the plan are in accordance with the standards of the Act and the Rules promulgated there-

5. Whether the amended plan as filed or as modified makes appropriate provision for the payment of expenses, fees and remuneration in connection with the recapitalization, and in what amounts such expenses, fees, and remuneration should be paid;

6. Generally, whether the amended plan and all proposed transactions incidental thereto are, in all respects, in the public interest and in the interests of investors and consumers and consistent with all applicable requirements of the act and the rules thereunder, and if not, what modifications and what terms and conditions should be required or imposed to satisfy the statutory standards:

7. Whether, in the event that the Commission shall approved the amended plan as filed or as modified, the Commission shall approve said plan for purposes of section 11 (d) of the act (as well as section 11 (e)) so as to permit the Commission, of its own motion and irrespective of any request therefor on the part of New York, to apply to a court for the enforcement of the amended plan pursuant to section 11 (d) of the act;

8. Whether, in the event that the Commission shall not approve the amended plan as filed or as modified, a plan proposed by the Commission or by any person having a bona fide interest in the recapitalization of New York should be approved by the Commission for purposes of section 11 (d) of the act, and, if proposed by the Commission, what the terms and provisions of such plan should be.

It is further ordered, That notice of this hearing is hereby given to New York, to Federal, to the Public Service Commission of the State of New York, and to all interested persons, said notice to be given to New York, to Federal, and to the Public Service Commission of the State of New York by registered mail, and to all other persons by a general release of this Commission which shall be distributed to the press and mailed to all persons on the mailing list for the release issued under the Public Utility Holding Company Act of 1935 and by publication in the Federal Register.

It is further ordered, That New York shall give additional notice of this hearing to the holders of its 6% Cumulative Preferred Stock (insofar as the identity of such security holders is known or is available to it) by mailing to each of said persons a copy of this notice and order at his last-known address at least fifteen days prior to the date of this hearing.

It is required that any person desiring to be heard in these proceedings shall file with the Secretary of the Commission on or before August 21, 1945 an appropriate request or application to be heard, as provided by Rule XVII of the Commission's rules of practice.

By the Commission.

[Special Order 15]

DESTRUCTION OF BITUMINOUS EMULSION CAMOUFLAGE PAINT

The War Department has declared surplus to the Reconstruction Finance Corporation as a disposal agency approximately one million gallons of bituminous emulsion camouflage paint, and the War Department has further quantities of this paint which it will or may

declare surplus in the future. The Reconstruction Finance Corporation, after endeavoring to find a commercial use for this paint and after exhaustive study, has submitted its findings to the Surplus Property Board.

The Reconstruction Finance Corporation has found "that such paint has no commercial value and that the cost of care and handling will in all cases far exceed any proceeds which might be realized from its disposition, for the following reasons: (1) This type of paint has no commercial value in its present form; (2) its conversion into a commercially usable product would necessitate a material increase in gallonage and be too expensive to be practical; (3) the paint's pronounced tendency to 'bleed through' any oil-base paint applied subsequently to its application renders it hazardous and useless as a commercial paint; and (4) the estimated cost of removing such paint from the drums would far exceed the sales price of the drums.'

The Reconstruction Finance Corporation has further reported that "the immediate destruction of bituminous emulsion camouflage paint determined to be surplus will in all cases be necessary and desirable because of the nature of the property and the expense and difficulty of its care and handling. It requires large and valuable storage space and entails various charges for its care and handling, and it is subject to evaporation, freezing and thawing, and consequent

leakage of the drums.'

Because of the fact that this paint has no civilian utility it is not deemed feasible to donate surplus supplies of it to any institution or agency supported by the Federal Government or any State or local government or to any nonprofit educational or charitable organization.

In reliance upon the findings of the Reconstruction Finance Corporation recited above, and pursuant to section 13 (b) of the Surplus Property Act of 1944 (58 Stat. 765; 50 U.S.C. App. Sup. 1611);

It is hereby ordered, That

1. The Reconstruction Finance Corporation and all owning agencies are hereby authorized to destroy any and all surplus bituminous emulsion camouflage paint now or hereafter in their possession.

2. In view of the fact that the nature of this property and the expense and difficulty of its care and handling are such as to render its immediate destruction necessary and desirable, neither the Reconstruction Finance Corporation nor any owning agency shall be required to give public notice of any proposed destruction of such property or to attempt to dispose of such property otherwise than by destruction.

3. The Reconstruction Finance Corporation and any owning agency shall, within twenty (20) days after any destruction carried out under the authority of this order, report in writing to the Surplus Property Board the amount of

property destroyed.

This order shall become effective August 1, 1945.

Note: The reporting requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.
